

Built-in Microban® Antimicrobial product protection helps Fight bacteria growth 24/7!

Verbatim is launching USB drives exclusively featured with Microban® antimicrobial technology, to keep the USB drive surface cleaner for longer.

This unique, one-of-a kind USB drive integrates Microban® product protection during manufacturing – helping to fight the growth of bacteria 24/7. For the life of the USB drive, consumers will have greater peace of mind about the cleanliness of their drive, use after use.

How Does Microban® Technology Work?

Microban® technology works by helping fight the growth of bacteria on a surface. Bacteria, a type of microbe, can lead to an array of problems including bad odors, product and surface stains, a reduced product lifetime and more.

24/7 Product Protection

- Device stays inherently cleaner for longer with always-active, 24/7 product protection
- Lifetime protection against the growth of product degrading bacteria, extending useful life and functionality of the flash drive
- Greater peace of mind for end-users between handling and transport
- Contains a globally registered technology with a history of safe use
- Surface protection for a product that is often overlooked when cleaning

Microban® technology offers these benefits and more:
